

Name of Student: youssouf issaka borgou	PRN:25070122090
Semester: III	Year : AY 2026-27
Subject: Programming with Java	
ASSIGNMENT No : 3	
TITLE : Method Overloading and Static Members	

Problem Statement

Develop a Java application demonstrating method overloading and the use of static variables, methods in class design.

Learning Objectives

To implement method overloading and use static variables and methods in Java programs.

Programme

```
class Stc_ovrl{
    static int count;
    int a;
    int b;

    Stc_ovrl()
    {
        System.out.println("Inside Default Constructor");
        a=10;
        b=20;
        count++;
    }
}
```

```
    Stc_ovrl(int p, int q)
    {
        System.out.println("Inside Parameterized constructor");
        a=p;
        b=q;
        count++;
    }
    void show()
    {
        System.out.println("Value of a:"+a);
        System.out.println("Value of b:"+b);
    }
    void show(int p, int q)
    {
        System.out.println("Value of a:"+p);
    }
}
```

```

        System.out.println("Value of b:"+q);
    }
    void show(int p){
        System.out.println("Passed value : "+p);
    }
    static void countShow(){
        System.out.println("Total number of object :"+count);
    }
}
public class Stc_ovrld
{
    public static void main(String[] args) {
        Stc_ovrld m1 = new Stc_ovrld();
        Stc_ovrld.countShow();
        m1.show();

        Stc_ovrld m2 =new Stc_ovrld(56,89);

        // Stc_ovrld.countShow();
        m2.show(m2.a,m2.b);
        Stc_ovrld m3= new Stc_ovrld(100,200);
        m3.show(m3.a);
        m3.show(m3.b);
    }
}

```

Output

```

PS C:\CS-JAVA\.vscode> javac Stc_ovrld.java
PS C:\CS-JAVA\.vscode> java Stc_ovrld
Inside Default Constructor
Total number of object :1
Value of a:10
Value of b:20
Inside Parameterized constructor
Value of a:56
Value of b:89
Inside Parameterized constructor
Passed value : 100
Passed value : 200
PS C:\CS-JAVA\.vscode> 

```

Conclusion
