

Name of Student: YOUSOUF ISSAKA BORGOU	PRN:25070122090
Semester: III	Year : AY 2026-27
Subject: Programming with Java	
ASSIGNMENT No : 9	
TITLE : Final Keyword in Java	

Problem Statement

Write a Java program to demonstrate the use of the final keyword with variables, methods, and classes.

Learning Objectives

To implement the final keyword with variables, methods, and classes.

Programme

```
final class FinalClass
{
    void display()
    {
        System.out.println("this is a final class");
    }
}
public class FinalClas
{
    public static void main(String[] args)
    {
        FinalClass obj = new FinalClass();
        obj.display();
    }
}
```

Finalmethod

```
class parent
{
    final void display()
    {
        System.out.println("final method in parent class");
    }
}
class child extends parent
```

```

{
    // void display() {} compilation error if attempted
}
public class FinalMethodExample
{
    public static void main(String[] args)
    {
        child c= new child();
        c.display();
    }
}

```

Output

Final class

```

PS C:\CS-JAVA> javac Finalclas.java
PS C:\CS-JAVA> java FinalClas
this is a final class
PS C:\CS-JAVA> 

```

Final method

```

PS C:\CS-JAVA> javac FinalMethodExample.java
PS C:\CS-JAVA> java FinalMethodExample
final method in parent class
PS C:\CS-JAVA> 

```

Conclusion

Final is used to define a method or a class that we can not call inside an other class . we successfully write final class and final method.
